## Employment

---

### Freelance | 2018 (January) - Present

Freelance Developer (PHP: Codeigniter, Silverstripe, Wordpress, Shopify | JavaScript: React, ES6 | HTML, CSS)

Worked on projects for Assessing Wellbeing in Education, Lasso Travel, Minicami NZ and Monarc Jewellery doing both frontend and backend work. Lead development on the rebuild of AWE, an assessment and reporting web app, focussing on improving security, performance and scalability.

### Fergus Trade Software | 2016 (March) - 2017 (December)

Software Engineer (JavaScript: React / Redux, Webpack, ES7 | PHP: Laravel, Codeigniter | HTML, CSS / Less)

Worked on the product team developing the main product (Fergus, Codeigniter), as well as the CRM (Candy, Laravel). Produced high quality work working with bleeding edge technologies, often under deadline. Worked alongside designers and customers to improve the product and better scope out features and functionality. Focused on producing high quality, clean and thoroughly tested code.

### Beans & Rice | 2014 (March) - 2016 (March)

Full-Stack Web Developer (PHP: Silverstripe, Codeigniter | JavaScript: React, Node, Express | HTML, CSS / Sass)

Produced quality work in a fast-paced environment, meeting deadlines and client expectations for quality and creativity. Lead development for all projects, and worked directly with clients during planning and design stages. Managed company and client servers, as well as handling security. I would often learn new technologies to best complete a project.

### Stray Travel | 2011 (September) - 2014 (March)

Full-Stack Web Developer (PHP: Silverstripe, Codeigniter | JavaScript: jQuery, Vanilla | HTML, CSS)

Started in a junior role developing a rewards system (built with Codeigniter), while also helping the lead developer with the NZ booking site (Silverstripe). Eventually took over the role of lead developer, leading development on the Asia site (Silverstripe) as well as maintaining the existing NZ site.
