## Employment

### Weta Digital | 2020 (March) - Present

Frontend Developer (JavaScript: TypeScript, React/Redux, GraphDB)

Working on a proprietary web app alongside backend developers (Python/NodeJS) used for project management and projections. Primarily bespoke components with heavy focus on performance.

### THE ICONIC | 2018 (July) - 2020 (March)

Software Engineer (JavaScript: TypeScript, React/Redux, Angular, Node, NextJS, NestJS | HTML, Sass)

Built high level software on the Marketing Innovation team, consisting of microservices to feed into the main site along with tools to enable internal teams. Produced code with full test coverage utilising the best technologies suited to the project. Worked closely with product owners across various departments to ensure success across all projects.

### Freelance | 2018 (January) - 2018 (June)

Freelance Developer (PHP: CodeIgniter, Silverstripe, Wordpress | JavaScript: React/Redux, ES6 | HTML, CSS)

Worked on projects for Assessing Wellbeing in Education, Lasso Travel, Minicami NZ and Monarc Jewellery doing both frontend and backend work. Lead development on the rebuild of AWE, an assessment and reporting web app, focussing on improving security, performance and scalability.

### Fergus Trade Software | 2016 (March) - 2017 (December)

Software Engineer (JavaScript: React / Redux, Webpack, ES7 | PHP: Laravel, CodeIgniter | HTML, CSS / Sass)

Worked on the product team developing the main product (Fergus, CodeIgniter), as well as the CRM (Candy, Laravel). Produced high quality work working with bleeding edge technologies, often under deadline. Worked alongside designers and customers to improve the product and better scope out features and functionality. Focused on producing high quality, clean and thoroughly tested code.

### Beans & Rice | 2014 (March) - 2016 (March)

Full-Stack Web Developer (PHP: Silverstripe, CodeIgniter | JavaScript: React, Node, Express | HTML, CSS / Sass)

### Stray Travel | 2011 (September) - 2014 (March)

Full-Stack Web Developer (PHP: Silverstripe, CodeIgniter | JavaScript: jQuery, Vanilla | HTML, CSS)
